

GARBAGE CHUTE CLEANING

BROUWER BROTHERS is ready to help get your building cleaned. Reach out to us for our multi-year or multi-service options.

Bundle any of our services together to save and lock in the pricing for up to 2 years.

Cockroaches and fruit flies love a dirty garbage chute. **Brouwer Brothers Steamatic** can help ensure the health and safety of your building and its tenants by keeping your chutes clean.

We first treat the interior surfaces of the chute with a biodegradable enzyme to help de-grease and loosen buildup. We then follow up with 200+ degree water pressure washing to flush the contaminants and odors down the chute.

This service focuses on **REDUCING ODORS, KILLING INSECTS** and **MICROORGANISMS**, as well as **CLEANING AND DEGREASING THE SURFACE OF THE CHUTE.**
