

the lee quigley company

Architectural refinishing and maintenance of metal, stone, and wood

The lee quigley company was founded in Chicago in 1978. Since then, we have grown to several offices across the United States. This includes offices in Chicago, Dallas, Atlanta, Georgia, Houston, New Orleans, and Austin. We have been providing our customers with top-of-the-line quality metal, stone, and wood refinishing and maintenance. We service all types of metals including aluminum, stainless steel, bronze, brass, copper, and steel. We also service granite, marble, terrazzo, and quartz. We are certified applicators of high-tech paint finishes that include Duranar ADS. Our services are flexible, we can provide customers with a one-time service, or more commonly provide our customers with an ongoing maintenance program for their metal, stone, and wood.

I, myself, have been at lee quigley since 1984. I started as a helper and worked my way up to a foreman. From there I became a superintendent and am now currently an owner of the lee quigley company. I take immense pride in my work, and make sure that every customer receives the highest quality of care and service that could be provided to them.

For any questions about the services we can provide you, please contact me:
