ABOUT US

AR-CORE ELECTRIC & ENGINEERING has been providing construction and design build services for projects throughout the Chicagoland area and the surrounding collar counties for 30 years.

AR-CORE ELECTRIC prides itself on providing complete electrical and design build services. Utilizing our engineers to provide up to date code compliant projects for all of our customer needs.

We have designed commercial, industrial, medical and multi-unit residential projects, throughout the Chicago area.

We are a union electrical contractor serving, Cook, DuPage, Will and Lake counties. We employ certified union electricians trained in the latest technologies to install complete code compliant electrical systems.

DESIGN BUILD

AR-CORE ELECTRIC can provide design build services utilizing our engineers to provide design build services utilizing our engineers to provide complete code compliant designs for commercial, industrial, institutional and retail facilities. We can provide inspection on customers existing building electrical systems to determine required upgrades or repairs to existing code violations. We are currently working on micro grid designs with a local university to get a foot hold in this new technology.

FACILITY SERVICES

- We provide 24/7 maintenance and emergency response for First Service Residential units which manages over 4000 multi-unit residential buildings in the Chicago area.
- We provide infrared and thermal imaging inspections.
- We provide light fixture and lighting control upgrades.
- We provide inspection of existing electrical services.
- We provide company engineers to facilitate ComEd responses to customer power quality issues.
