

### About Us...

Berna Construction opened its doors in 2007 as a commercial plumbing company.

As our customer needs grew, so did our company.

Berna Construction expanded to Heating and Cooling and General construction in 2017.

Berna Construction is a woman owned business and is in the process of obtaining its formal certification.

Giving back is important to us, we hold an annual Thanksgiving Turkey Brigade and fed 1000 families last year alone.

Most of our work is completed by our employees.

RENATA BERNATONIS
